Hi Donna:

I don't recall the Board passing a resolution empowering the Society to do anything except set up a meeting with all players. I think this needs to go on the March 14h agenda for the Board's direction.

Isabell

NPOA  
 Bella Coola  
 March 6, 2013

The Nusatsum Bridge spur project

Dear Isabell:

We are bringing forward again the response to your board's resolution of Jan. 7. 2013 which directs and empowers our society to move forward in creating a plan for high water mitigation in the Bella Coola Valley. The attached letter encapsulates the work we have done since that board meeting. There is presumably funds left in the CCRD Flood Mitigation account and we are saying to you, do what you can with what you have, that will work as a part of a larger mitigation program that uses preventative measures that are affordable and effective. The Nusatsum Spur Project is one of them and we are requesting that you put into resolution, the following actions:

1. A letter to MLNRO confirming your support of the Nusatsum Bridge Spur and adding the consideration of the Diking Authority be on-going. Most likely the referendum for the Diking Authority will be rejected by the citizens of the Bella Coola Valley but that will be confirmed in approximately a year when the process takes place. The letter should read, as is, there is no diking authority and all work will have to proceed without it.
2. Allocate funds up to and including \$10,000 for engineering plans for repairing the Nusatsum Bridge Spur.
3. Reserve funds for the repair and re-construction of the spur according to the approved

engineered reports.

We have gotten the relevant parties together to create this very small action to save a neighborhood as a part of a fifty year plan for the valley. This is in response to your resolution of January 7, 1013. Please help advance the movement forward by writing the letter, requested in action sentence one. Please arrange to have this as an agenda item for the March 14th board meeting.

Marvin Schmunk
