Reginald Moody-Humchitt, Chair
Central Coast Regional District
626 Cliff Street
Bella Coola, BC V0T 1C0

RECEIVED

APR 23 2015

Central Coast Regional District

Dear Mr. Moody-Humchitt,

Re: Congratulations on your election as Regional District Chair

Congratulations on your election as Chair of the Board of Central Coast Regional District in December 2014. You have a formidable task to perform over the coming year and we wish you and your directors all the best in seizing the opportunities that come to your region during this time. We know there will be challenges that demand innovative solutions and new strategies to manage them.

As you may already know, Geoscience BC is an independent, non-profit organization mandated to generate and deliver publicly available earth science information. We work with First Nations, communities, governments and the mineral and energy sectors to develop projects to attract investment and support sustainable mineral and energy exploration and development for the benefit of all British Columbians. The provincial government has invested in the organization since our inception in 2005 and we have leveraged our funding through partnerships with industry, universities and local economic development organizations, including the Northern Development Initiative Trust.

Geoscience BC's programs have contributed to new exploration investment, job creation, and increased local business opportunities throughout the Province. We undertake First Nation and community outreach programs to raise awareness of the opportunities in and associated with the minerals and energy sectors.

If you, your board or someone in your community require information about our projects specifically or generally about the mineral or energy sectors in BC, please feel free to contact me or our Director, Business Development, Andrea Clifford at any time.

Andrea and I look forward to seeing you at your Local Government Association AGM and Conference this spring, at the Union of BC Municipalities Convention in September and/or one of the resource conferences held throughout BC this year.

Sincerely,

Robin Archdekin
President & CEO
Geoscience BC
